

Shared Learning at Home

Here are some activities for you to choose from this term to do at home.

We expect you to complete a minimum of 3 by **Monday 22nd October**.

We then expect you to complete at least another 3 by **Monday 17th December**.

You can bring in any of the work you have completed on any Monday to share with the class.

Your activities will be given a stamp:

<i>Good standard of work</i>	<i>High standard of work</i>	<i>Excellent standard of work</i>

If you use a special app or IT programme to present your activity, with your parents' permission, you can bring your mobile device to school to share this on **Monday 22nd October and/or Monday 17th December**.

Please note: Bringing a mobile device to school will be at your own risk. If you choose to do this you will need to hand this to your teacher first thing in the morning.

You can use your Shared Learning book to record any written work or drawings or photographs.

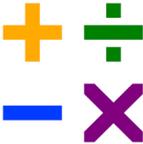

Remember to do work of your highest standard by always trying your best with handwriting and presentation.

Enjoy - we can't wait to see what you choose!

(Reading, spellings and weekly Active Learn Maths activities will continue as normal)

Our class topic is: Here and Now, There and Then (The Victorians)

You can choose which activities you would like to complete. You can think about ideas for our topic or we would also love to find out about your own interests.

<p>Write about something that interests you. <i>Try telling someone else why you like it, e.g. use persuasive language.</i></p>	<p>Make a wordsearch or crossword.</p> 	<p>Practise your times tables. <i>Think about how you could tell someone else how you have learned them.</i></p>
<p>Make a number of your choice using as many different strategies as possible.</p> 	<p>Have fun outside and tell us about it! <i>e.g. You could do a recount, a mind map, pictures with captions or create a leaflet.</i></p>	<p>Write a poem, a song or a story.</p> 
<p>Make a picture or collage or model out of any materials you can find.</p> 	<p>Make a poster telling someone how to stay safe online.</p> 	<p>Tell us what interests you about something that has recently happened / is happening in the news.</p>
<p>Think about Science..... Your topic this term is Electricity. Create a circuit showing how electricity works.</p>	<p>Create a maths game or activity that you can play with a friend. Try to include some strategies you have been learning.</p>	<p>Free choice - see seesaw and your class working wall for your class's ideas.</p>
